
MONOCLONAL ANTIBODY TO (1→5)- α -L-ARABINAN (LM6) (RAT IgG, KAPPA LIGHT)

FOR RESEARCH PURPOSES ONLY

Cat. No. 600-4

SPECIFICITY

This antibody recognizes pectic (1→5)- α -L-arabinan.

Generated using a neoglycoprotein (arabinoheptaose-BSA). It recognizes debranched arabinan (Megazyme #P-DBAR).

This antibody can be used with second stage anti-rat antibodies labelled with gold, FITC, HRP etc.

USE

Reconstitute in 150 μ L of 120mM NaCl.

When reconstituted, the antibody concentration is 1mg/mL in 10mM phosphate buffer (pH 7.2), 0.8% sodium chloride.

In dot blot assays we found the 1mg/mL solution to be 10 to 100x more sensitive than the original *Plant Probes* generated supernatant.

STORAGE

This freeze-dried product has been shipped at ambient temperature; however, it should be stored for extended periods at less than 4°C, with desiccant.

Once reconstituted, store at 4°C short term, or at -20°C in aliquots longer term. Do not re-freeze after thawing. Once thawed, store at 4°C.
