

MONOCLONAL ANTIBODY TO XYLOGLUCAN (LM25) (RAT IgM, KAPPA LIGHT)

FOR RESEARCH PURPOSES ONLY

Cat. No. 600-8

SPECIFICITY

This antibody recognizes xyloglucan. neoglycoprotein Generated using а incorporating the xylosylated/galactosylated oligosaccharides from tamarind xyloglucan (XXLG and XLLG). It recognizes a range of xyloglucan-specific oligosaccharide motifs in several species.

It recognizes xyloglucan from Tamarind seed (Megazyme P-XYGLN).

This antibody can be used with second stage anti-rat antibodies labelled with gold, FITC, HRP etc.

USE

Reconstitute in 150µL of 120mM NaCl.

When reconstituted, the antibody concentration is 1mg/mL in 10mM phosphate buffer (pH 7.2), 0.8% sodium chloride.

In dot blot assays we found the 1mg/mL solution to be 10 to 100x more sensitive than the original Plant Probes generated supernatant.

STORAGE

This freeze-dried product has been shipped at ambient temperature: however, it should be stored for extended periods at less than 4°C, with desiccant.

Once reconstituted, store at 4°C short term, or at -20°C in aliquots longer term. Do not re-freeze after thawing. Once thawed, store at 4°C.
